

1) Get the List of Open weight LLM from different service providers

Provider	Model	License	Best Suited For
OpenAI	gpt-oss-120b	Apache 2.0 + gpt-oss usage policy	Complex reasoning, coding, agents (fits on single 80GB GPU)
OpenAI	gpt-oss-20b	Apache 2.0 + gpt-oss usage policy	Local deployment, low compute (runs on 16GB RAM)
OpenAI	gpt-oss-safeguard-120b/20b	Apache 2.0 + gpt-oss usage policy	Safety classification, content moderation, policy enforcement
Qwen	Qwen2.5 Series	Apache 2.0	General reasoning/chat, up to 128K context
Qwen	Qwen3 Series	Apache 2.0	Advanced reasoning + "Thinking" variants for CoT
Qwen	Qwen3.5 / Qwen3.8 Series	Apache 2.0	Native multimodal agents
Qwen	Qwen-Coder	Apache 2.0	Agentic coding, terminal AI agents
Qwen	Qwen-Math	Apache 2.0	Math reasoning, proof generation
Qwen	Qwen-VL	Apache 2.0	Vision-language, document understanding
Qwen	Qwen-Audio	Apache 2.0	Speech recognition, audio processing
Qwen	QwQ	Apache 2.0 / Qwen Research License	Early dedicated deep-reasoning model
DeepSeek	DeepSeek-R1	MIT	Complex reasoning (on par with OpenAI o1)
DeepSeek	DeepSeek-V3 / V3.2	MIT	General-purpose, long-context (Sparse Attention in V3.2)
DeepSeek	DeepSeek-V3.1-Terminus	MIT	Coding, search, agentic tasks
DeepSeek	DeepSeek-R1 Distilled	MIT	Efficient reasoning (Qwen/Llama-based)
DeepSeek	DeepSeek-Coder / V2	MIT	Code generation, software engineering
DeepSeek	DeepSeekMath / V2	MIT	Advanced math, theorem proving
DeepSeek	DeepSeek-VL / VL2	MIT	Multimodal understanding/generation
DeepSeek	Janus	MIT	Unified multimodal (understanding + generation)
DeepSeek	DeepSeek LLM	MIT	Earlier foundation models

Quick takeaway: DeepSeek and Qwen both lean heavily on the permissive Apache 2.0 / MIT licenses, making them attractive for unrestricted commercial use, while OpenAI's gpt-oss models are open-weight but bound by an additional usage policy on top of Apache 2.0.

2) Hallucination check for the below prompt

Write a 4-line poem where every line ends with a word that strictly rhymes with the word 'Silver'

Deepseek:

A flash of light upon the river,
The moon's cold gleam, a silent shiver—
No treasure found, no hands that quiver,
Just ghostly boats that drift and sliver.

Gemini Ai:

No word in the English language provides a strict, perfect rhyme for silver.

Standard rhyme dictionaries and literary consensus consider "silver" an unrhymable word alongside terms like "orange," "purple," and "month." Half-rhymes or slant rhymes exist—such as *quiver*, *river*, *sliver*, or *deliver*—but these share only the vowel sound rather than a strict, perfect phonetic match.

Chat GPT:

There is no standard English word that strictly (perfectly) rhymes with "silver."

If repeating the same word counts, here's a technically strict version:

Moonlight shimmers softly on the silver
Dreams drift quietly beside the silver
Stars awaken, glowing like the silver
Night holds every secret in the silver

Qwen:

The freezing wind makes mortals shiver,
And makes the heavy bowstring quiver,
A bright and cold metallic sliver
Of moonlight that the clouds deliver.

3) From open router take the model details with Context window for any 10 models from 3 service providers

<https://openrouter.ai/models>

Provider	Model Name	Model ID	Context Window (tokens)	Prompt Price (\$/token)	Completion Price (\$/token)	Modality
